## Professional Summary

Software Engineer with 10 months of production experience in **Python/Java backend development, troubleshooting, automation, AWS, and API testing**. Diagnosed issues across **15+ production services and automated 6 workflows**, improving operational efficiency and reducing incident response time by **30%**.

## Core Skills

**Languages** Python, Java, JavaScript, C++, SQL
**CS Fundamentals:** Data Structures & Algorithms, OOP, Design Patterns, Problem Solving
**Software Development:** Backend Development, REST APIs, API Integration, Clean Code, Code Reviews
**Systems & Cloud:** Distributed Systems, AWS, Lambda, EC2, S3, CloudWatch, CI/CD
**Testing & Reliability:** Unit Testing, Automated Testing, Regression Testing, Debugging, Root Cause Analysis, Monitoring, Logging
**Databases:** MySQL, Amazon Timestream, SQL, Data Processing, Data Validation
**Tools:** Git, GitHub Actions, Postman, Selenium

## Professional Experience

**Titan Company Limited (TATA)** | ***Software Engineer Intern*** | Oct 2024 - July 2025 | *Bangalore, India*

- Built Java/Python backend features across **6 workflows**, saving **10+ engineering hours/week**.
- Developed REST API integrations and automated tests, catching **80%** of regression defects before deployment.
- Diagnosed issues across **15+ production** services using debugging and root-cause analysis, **reducing incident response time** by **30%**.
- Implemented AWS-based monitoring and validation workflows, improving production service reliability and operational visibility.

## Key Projects

**Automated Multi-Brand Website Visual Monitoring Tool** | *AWS CloudWatch Synthetics, AWS Lambda, S3, Selenium, Grafana* | *(May 2025 – July 2025)* | **GitHub**

**Automated** visual and performance monitoring of **7 brand websites** across homepage, PLP, and PDP pages to detect issues without manual checks.

- **Automated** monitoring **3× daily**, centralizing screenshots and service metrics to improve production visibility and reduce manual validation effort.

**AI Issue Resolution Bot** | *Python, FastAPI, REST APIs, AWS Q Business, RAG, RBAC* | *( Dec 2024 - Feb 2025)* | **GitHub**

Built a backend support service that retrieves relevant enterprise knowledge and provides contextual answers to technical issues through **REST APIs**.

- **Implemented** RBAC and fallback handling to improve **secure, reliable access** to enterprise support information.

## Certifications

- AWS Certified Solutions Architect - Associate | *July 2024 - July 2027*
- Choose the Right Software Development Methodology — ServiceNow | *May 2026*

## Education

**SRM Institute of Science and Technology, Chennai, India** | *June 2021- July 2025*
*B.Tech Computer Science and Engineering, specialization in Cloud Computing*
**Final-Year Project:** ***Intelligent Image Deduplication*** **— Published in IEEE, 2024 | Link**

## Soft skills

Analytical Thinking, Problem-Solving, Ownership & Accountability, Cross-Functional Collaboration, Technical Communication, Adaptability, Continuous Learning.
